

SolarWinds® and Cisco® Team up on Virtualization

Managing the Impact of Virtualization Technology on Your Network

Join virtualization experts, Josh Stephens, VP of Technology at SolarWinds and Neal Mueller, Nexus 1000V Product Manager, at Cisco for a technical webcast on the impact of virtualization on your network infrastructure. They'll discuss how to manage virtual switch infrastructure within your network monitoring system and best practices for analyzing network traffic within the virtualized ecosystem. Specifically they'll cover:

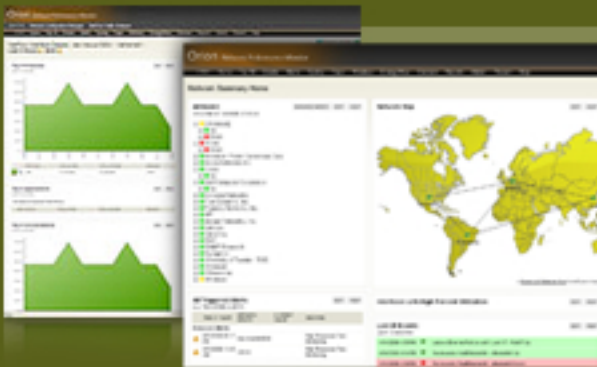

- Changes in network behavior caused by virtualization
- How to plan for the impact of virtualization
- Overview of virtual switch technology
- Understand how to monitor the Nexus 1000V's network performance
- Learn how to monitor the 1000V's ESX infrastructure
- Tips for monitoring a virtual network environment

New Virtualization Bundle:

Cisco Nexus 1000V + SolarWinds Orion NPM Bundle ONLY \$2425 (SAVE \$745)

Get management and visibility of virtual infrastructure performance in an easy-to-use, easy-to-afford package!

Considering virtualization? SolarWinds and Cisco have teamed up on a new virtualization bundle. For a limited time, you can save big when you buy SolarWinds Orion Network Performance Monitor (NPM) and Cisco Nexus 1000V* through your reseller.

The Cisco® Nexus 1000V switch provides advanced Cisco networking features in a virtual infrastructure environment. Orion offers the same ease of management for the Nexus 1000V as any other switch.

*Note: If you purchase Nexus 1000V as part of VMware vSphere, this promotion may be applied. To learn more, contact your reseller. This promotion is offered exclusively through resellers in the United States and Canada. Offer expires December 31, 2009.
