## Automated network configuration and change management software to standardize and protect your network

Before you monitor your network, configure it! A reliable and secure network starts with carefully planned, executed, and monitored network configuration and change management. SolarWinds® Network Configuration Manager (NCM) saves time and improves network reliability and security by managing configurations, changes, and compliance for routers, switches, and other network devices from Cisco®, Juniper®, HP®, Dell®, Brocade®, F5® Aruba®, Rokus®, and more.

## Network Configuration Manager at a Glance

- Reduce configuration errors using standardized device configurations and deployment automation
- Improve network reliability using change monitoring, alerting, configuration backup, and rollback
- Manage change using workflows to approve updates, and safely delegate work to others with roles and permissions
- Improve network security and compliance by using NCM automation to identify IOS vulnerabilities, upgrade IOS firmware and audit device configs for NIST FISMA, DISA STIG, and DSS PCI compliance

## Features

### Network Configuration and Change Management

#### **Configuration Change Automation**

Simplify and standardize recurring or complex configuration changes by creating a single vendor-neutral script that can be scheduled and executed on multiple devices.

#### **Configuration Backup and Restore**

Quickly recover from a configuration change or catastrophic device failure by always having the latest device configuration archives to restore.

#### **Change Monitoring**

Always know when a configuration has changed. An alert signals you to trace the change down to the device, and allows you to view what specific changes were made. Now NCM is integrated with Network Performance Monitor's NetPath™ feature for detailed configuration changes when a configuration in the network service path has changed.

#### **Change Management**

Prevent mistakes by reviewing and approving proposed changes using integrated change approval workflow. Use role and access permissions to improve delegation and collaboration by controlling who can make changes to devices and configurations.

#### **IOS Vulnerability Scanning**

Improve network security by automatically identifying IOS vulnerabilities and easily upgrading IOS firmware.

#### **Compliance Assessment and Enforcement**

Always demonstrate compliance to critical security standards using out-of-the-box, automated compliance assessments and reports for DISA STIG, NIST FISMA, and PCI DSS. Use automated remediation scripts to correct out-of-compliance issues.

## System Requirements

HARDWARE		MINIMUM REQUIREMENTS	
CPU		Quad core 2.5Ghz or better	
Memory		4GB minimum 8GB recommended	
Hard Drive		20GB	
SOFTWARE		MINIMUM REQUIREMENTS	
OS		<ul style="list-style-type: none"> <li>▪ Windows® Server 2008 R2 SP1</li> <li>▪ Windows Server 2012</li> <li>▪ Windows Server 2012 R2</li> </ul>	
.NET Framework		Version 4.5 Required	
Database		<ul style="list-style-type: none"> <li>▪ SQL Server® 2008, 2008 SP1, 2008 SP2, 2008 SP3, 2008 SP4</li> <li>▪ SQL Server 2008 R2, 2008 R2 SP1, 2008 R2 SP3,</li> <li>▪ SQL Server 2012, 2012 SP1, 2012 SP2, 2012 SP3</li> <li>▪ SQL Server 2014, 2014 SP1</li> <li>▪ SQL Server 2016</li> </ul>	
SUPPORTED PROTOCOLS			
SolarWinds Network Configuration Manager supports multiple protocols, including SNMP v1/v2/v3, Telnet, SSH v1/v2, and TFTP			
INTEGRATION WITH OTHER SOLARWINDS PRODUCTS AND RESOURCES			
SolarWinds Network Configuration Manager offers tight integration with SolarWinds Network Performance Monitor, SolarWinds Firewall Security Manager, SolarWinds Web Help Desk®, SolarWinds Engineer's Toolset, and THWACK®.			

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

## Try before you buy. Download a free trial!

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials that deliver full product functionality. Simply download and install the software and take a break while Network Configuration Manager discovers your network devices and config details. When you get back, your configuration management environment will be waiting for you, complete with out-of-the-box dashboards, alerts, reports, and more! It's just that simple.

## About SolarWinds

SolarWinds provides powerful and affordable IT management software to customers worldwide, from Fortune 500® enterprises to small businesses, managed service providers (MSPs), government agencies, and educational institutions. We are committed to focusing exclusively on IT, MSP, and DevOps professionals, and strive to eliminate the complexity that our customers have been forced to accept from traditional enterprise software vendors. Regardless of where the IT asset or user sits, SolarWinds delivers products that are easy to find, buy, use, maintain, and scale while providing the power to address key areas of the infrastructure from on-premises to the cloud. This focus and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as the worldwide leader in both network management software and MSP solutions, and is driving similar growth across the full spectrum of IT management software. Our solutions are rooted in our deep connection to our user base, which interacts in our [THWACK](#) online community to solve problems, share technology and best practices, and directly participate in our product development process.
