SolarWinds® NetFlow Traffic Analyzer (NTA) allows you to capture data from continuous streams of network traffic, and convert those raw numbers into easy-to-interpret charts and tables that quantify exactly how the corporate network is being used, by whom, and for what purpose. With SolarWinds NTA, it’s easier than ever to collect and analyze Cisco® NBAR2 and NetFlow, Juniper® J-Flow™, IPFIX, sFlow®, Huawei NetStream™, and other flow data.

**NETFLOW TRAFFIC ANALYZER AT A GLANCE**

» Monitors network bandwidth and traffic patterns down to the interface level

» Identifies which users, applications, and protocols are consuming the most bandwidth

» Highlights the IP addresses of top talkers

» Explores historical IP flow conversations with up to one-minute granularity

» Analyzes Cisco NBAR2 and NetFlow, Juniper J-Flow, IPFIX, sFlow, Huawei NetStream, and other flow data
FEATURE HIGHLIGHTS

BANDWIDTH UTILIZATION MONITORING

Bandwidth Threshold Alerting
Delivers an instant alert notification, including a list of top talkers when an interface exceeds its bandwidth utilization threshold.

Bandwidth Usage by Application
Provides valuable insights into which applications are consuming the most network bandwidth, and tracks application traffic arriving from designated ports, source IPs, destination IPs, and even protocols.

Bandwidth Usage by IP Groups
Analyzes network traffic with custom overlapping IP address groups. Create your own IP address groups to view network traffic the way that you want to see it.

NETWORK TRAFFIC MONITORING AND FORENSICS

Traffic Analysis Dashboard
Delivers a comprehensive, customizable view of your network traffic on a single pane of glass, allowing you to spot potential problems quickly with top ten views of network traffic data. Get to the root cause of bandwidth issues with an intuitive point-and-click interface.

Cross-stack Network Data Correlation
Accelerate identification of root cause by dragging-and-dropping network performance metrics on a common time line for immediate visual correlation across all of your network data.

Network Traffic Forensics
Enables you to drill down into any element’s traffic using multiple views to get the perspective you’re looking for. You can investigate and isolate excessive network bandwidth utilization and unexpected application traffic.

CBQoS Performance Views
Enables you to view network traffic segmented by Class of Service methods, measure effectiveness of your CBQoS policies, and quantify bandwidth consumption by class map.

Border Gateway Protocol
Enables you to set up customized views of internet traffic for ISPs and organizations to better understand how traffic is balanced across providers.

FLOW-BASED MONITORING AND REPORTING

Multi-Vendor Device Support
• Analyzes NBAR2, NetFlow v5, NetFlow v9, sFlow v2, v4, v5, IPFIX, J-Flow, and Huawei NetStream data
• Supports devices from Cisco, Extreme Networks, HP®, Juniper, Nortel Networks, Huawei, and other leading vendors
• Supports NetFlow traffic from VMware® vSwitch

Flow-based Reporting
Enables you to create in-depth network traffic reports with a few clicks, or schedule automatic weekly delivery to your team.

Flow Navigator
Enables you to create and access personalized network traffic views by filtering NBAR2, NetFlow, J-Flow, sFlow, IPFIX, and Huawei NetStream data.
Top-Talker Optimization
Determines which flows are representative of the majority of bandwidth usage. It stores those flows while disregarding flow data from users and applications that have a negligible impact on overall bandwidth. Boost overall performance of SolarWinds NTA up to 10x when capturing flows that represent 95% of the total network traffic.

SOLARWINDS NETFLOW TRAFFIC ANALYZER DOES MORE

Integrated Fault, Performance, and Configuration Management
Integrates with SolarWinds Network Performance Monitor (NPM), SolarWinds Network Configuration Manager (NCM), and SolarWinds User Device Tracker (UDT). This integration provides a unified solution for fault, performance, configuration management, automated device tracking, and switch port management.

Microsoft® Active Directory® Integration
Leverages your existing Active Directory user accounts to simplify login and account management.

SYSTEM REQUIREMENTS

<table>
<thead>
<tr>
<th>HARDWARE</th>
<th>MINIMUM REQUIREMENTS</th>
</tr>
</thead>
</table>
| CPU               | NTA Main Power - Quad Core 3 GHz or better  
                       NTA Flow Storage Database - Quad Core 3 GHz or better |
| Memory            | NTA Main Poller - 3GB  
                       NTA Flow Storage Database - 16GB |
| Hard Drive        | NTA Main Poller - 3GB  
                       NTA Flow Storage Database - 20GB |

<table>
<thead>
<tr>
<th>SOFTWARE</th>
<th>MINIMUM REQUIREMENTS</th>
</tr>

| OS                | NTA Main Poller - Windows® Server 2008 R2 SP1, 2012, 2012 R2  

INTEGRATION WITH OTHER SOLARWINDS PRODUCTS

To deploy SolarWinds NetFlow Traffic Analyzer, SolarWinds Network Performance (NPM) needs to be installed on the same server.

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the polling rate or flow collection rate could result in additional load on the server, which may require a larger CPU or additional memory.
TRY BEFORE YOU BUY. DOWNLOAD A FREE TRIAL!

Network traffic analysis has never been easier! Don't just take our word for it. Download a free 30-day trial and in about an hour, you can start analyzing network traffic and identifying which users, applications, and protocols are consuming the most bandwidth.

ABOUT SOLARWINDS

SolarWinds provides powerful and affordable IT management software to customers worldwide, from Fortune 500® enterprises to small businesses, managed service providers (MSPs), government agencies, and educational institutions. We are committed to focusing exclusively on IT, MSP, and DevOps professionals, and strive to eliminate the complexity that our customers have been forced to accept from traditional enterprise software vendors. Regardless of where the IT asset or user sits, SolarWinds delivers products that are easy to find, buy, use, maintain, and scale while providing the power to address key areas of the infrastructure from on-premises to the cloud.

This focus and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as the worldwide leader in both network management software and MSP solutions, and is driving similar growth across the full spectrum of IT management software. Our solutions are rooted in our deep connection to our user base, which interacts in our THWACK® online community to solve problems, share technology and best practices, and directly participate in our product development process.
