

# SolarWinds Traceroute NG

Leveraging SolarWinds unique and powerful NetPath™ technology, SolarWinds® Traceroute NG is a standalone free tool that offers continuous network path analysis, returning results in seconds. Designed for network administrators and IT professionals in businesses of all sizes, Traceroute NG is the traceroute tool with updated technological capacities, assuring a fully functional version of the once revered path analysis computer network diagnostic tool. Typically yielding results in less than two seconds, it provides an accurate single path from source to destination, and notifies users when the path is no longer available.

We've fixed the old traceroute with SolarWinds Traceroute NG!

---

## FEATURES:

- » 1. Gain accurate single path analysis visibility via CLI from the source to the destination, and effectively identify the number of hops, respective IP addresses, hostnames, packet loss, and latency.
- » 2. Detects path changes and gives due notification.
- » 3. Allows continuous probing that yields an iteration number for the user.
- » 4. Supports IPv4 and IPv6 networks.
- » 5. Creates a txt log file containing the path number and trace information.

## ADDITIONAL FEATURES:

- » Copies data from the screen to the clipboard
- » Allows you to switch the probe type between ICMP and TCP using the switch command
- » Enables simultaneous logging—using the logging command—and probing
- » Enable or disable DNS lookup

## SYSTEM REQUIREMENTS:

Windows® 8, Windows 8.1, Windows 10, Windows Server® 2012 R2, and Windows Server 2016
