## LOG MANAGER FOR ORION AT A GLANCE

- » Designed to collect syslog and SNMP trap data generated by your infrastructure to help you gain deeper insight and help with troubleshooting
- » Refine your log data via intuitive out-of-the box filters, and help you find relevant log entries instantly via a powerful search engine
- » Quickly visualize log volume, search results, and refine timeframes via an interactive chart
- » Reduce the flood of useless alerts with integrated Orion alerts
- » Integrate your log data directly into the Orion Platform console to easily view it alongside network and systems performance metrics

## SOLARWINDS LOG MANAGER FOR ORION FEATURES

### Syslog and trap collection and analysis

Your infrastructure is constantly generating log data to provide performance insight. Whether they're syslogs, SNMP traps, or Windows® events, they often can provide the crucial bits of insight to help with troubleshooting. Collect, consolidate, and analyze log information with one tool to help you find the root cause faster.

### Search and filter log data

Log data piles up fast and finding the right bit of information can be tricky. The Log Manager for Orion software helps you to easily perform searches and apply filters to refine your results. In addition, easily apply color-coded tags to your log data to aid with filtering, searching, and identifying performance issues.

### Real-time log stream

Traditional log collection and management tools generate reports in plain text or HTML. With SolarWinds Log Manager for Orion, you can also see an interactive real-time log stream. Ease troubleshooting by watching the log data to identify potential issues as they occur, and filter for particular keywords like event IDs or error codes.

### Orion intelligent alert actions

Be the first to know when issues arise. Log Manager integrates with the intelligent alert engine of the Orion Platform to provide customizable alerts, along with delivery options, including email notifications, ServiceNow® integration, and the ability to trigger an external script.

## FREQUENTLY ASKED QUESTIONS

### How is Log Manager for Orion licensed?

There's no need for complex volume calculations. The Log Manager for Orion licensing is based on the number of devices generating log data, regardless of volume.

### How do I configure my devices to send log data to Log Manager for Orion?

The steps vary between vendors; however, simply configure your SolarWinds Orion server as your logging destination on your device.

### Can I monitor Windows event logs?

Yes. With the SolarWinds free Event Log Forwarder for Windows you can forward Windows events based on events source, event IDs, computers, and keywords in the event to Log Manager for Orion.

**Where is my log data stored? How long is it stored for?**

Data is stored in the Log Manager SQL database for seven days by default; however, this can be easily configured within the product settings.

**What if Log Manager for Orion doesn't meet my needs?**

Whether you are in IT ops, infrastructure, monitoring, or DevOps, SolarWinds has the right log monitoring and management tool for you.

**SYSTEM REQUIREMENTS**

HARDWARE	MINIMUM REQUIREMENTS
CPU	2.0GHz dual-processor. Dual-core is recommended
Memory	8GB
Hard Drive	100GB
SOFTWARE	MINIMUM REQUIREMENTS
OS	Windows Server® 2012, 2012 R2, 2016
Database	SQL Server® 2016 SP1 SQL Full Text Search enabled is recommended
Web Browser	Internet Explorer® 11, Microsoft Edge®, Mozilla® Firefox® 45.0 or higher, Google® Chrome® 49.0 or higher

**NOTE:** The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.
