

Serv-U FTP Server

For Fast & Secure File Transfer

"We have continued to use Serv-U over the years because it is so easy to use, configure, and understand."

— Glenn Martin,
IT Admin, Washington
TV Station KSPS

SolarWinds® Serv-U® FTP Server delivers quick, easy, and reliable file transfer for your organization. You can exchange sensitive files with your trading partners using secure FTPS (FTP over SSL/TLS) over both IPv4 and IPv6 networks. Users can view, upload, and download files from intuitive web and mobile interfaces. Designed for small businesses, Serv-U FTP Server is an affordable and secure file transfer software that helps you accomplish all your internal and external file transfer needs.

SERV-U FTP SERVER AT A GLANCE

- » Secure FTP server software that supports FTP and FTPS (over SSL/TLS) for file transfers
- » Easily view, upload, and download files from anywhere—transfer files over Web and mobile devices
- » Supports large file transfers (>3GB) and multiple file transfers with drag-and-drop capability
- » Contains a variety of customization options for easy file transfer administration and management
- » Simple to deploy, easy to use, and extremely affordable
- » Available for Windows® and Linux® platforms

FEATURES

Secure File Transfer using FTPS (over SSL/TLS)

Serv-U FTP Server supports secure FTPS protocol for file transfers. You can encrypt files using SSL or TLS cryptographic protocol, and safely and securely exchange files with your business partners. When transferring files using FTPS, SSL/TLS protects the data in transit using SSL/TLS, and confidential information is protected from tampering, snooping, leakage, or accidental exposure.

Quick and Easy File Transfer from Web Browsers and Mobile Devices

From intuitive web client and mobile device interfaces, you can easily view, upload, and download documents in no time. With an interactive drag-and-drop file transfer option, your end-users can exchange files from anywhere on the fly.

Large File Transfer (>3GB) and Multiple File Transfers

Transfer large files (>3GB) with the help of a free, built-in web plug-in called "Web Client Pro." This plug-in also allows you to upload/download multiple files at once. Web Client Pro provides a transfer queue to pause or resume active file transfers and ask for confirmation before file overwrite.

Easy File Transfer Administration and Management

Perform file transfer administration and management from a single, easy-to-use management console. This includes real-time session monitoring and file transfer statistics, granular control over bandwidth, storage, permissions and access, access to virtual folders for local storage, remote shares, transfer ratio, and quota management for end-users, and more.

Monitor FTP Server Logs for Troubleshooting and Error Handling

View and monitor FTP server logs in real-time for easier troubleshooting and error handling. The server log shows file server startup, configuration, and shutdown information.

Easily Add File Transfer Users and Groups

Serv-U FTP Server enables you to easily add users and groups for file transfer. With the help of a wizard-driven interface, you can create new users and grant them access to the file server in just a few clicks.

Easily Manage FTP Server Settings and Permissions

Serv-U FTP Server allows you to easily configure file transfer settings and permissions on the file server. You can define limits for the maximum number of sessions on the server, block the IP address of a timed-out session, enable settings to require reverse DNS names, and more.

SECURE GATEWAY FOR FILE TRANSFER IN DMZ NETWORKS

Serv-U FTP Server integrates with the optional [Serv-U Gateway](#) to help ensure secure file transfer in your DMZ networks. Serv-U Gateway is the secure addition to Serv-U FTP Server that allows you to safely accept incoming file transfer connections in your DMZ. Serv-U Gateway provides defense-in-depth security to Serv-U FTP Server deployment.

Secure DMZ Deployment with Serv-U Gateway

INTEGRATION WITH OTHER SOLARWINDS PRODUCTS

Using Serv-U FTP Server, you can send server logs to [SolarWinds Log & Event Manager](#) (SIEM software) for deeper security analysis and compliance reporting.

Serv-U FTP Server lets you transfer files via the FREE desktop-based FTP client from SolarWinds – [FTP Voyager](#)®.

MANAGED FILE TRANSFER (MFT) FOR ENTERPRISE FILE TRANSFER

For larger file transfer and file sharing requirements, advanced security, scalability, and administration options, [Serv-U Managed File Transfer \(MFT\) Server](#) is a secure and comprehensive enterprise file transfer solution. While Serv-U FTP Server is limited to three domains, 250 user accounts, and 100 concurrent sessions, Serv-U MFT Server supports unlimited domains, users, and concurrent sessions. See [comparison of Serv-U FTP and MFT Server](#).

ABOUT SOLARWINDS

SolarWinds provides powerful and affordable IT management software to customers worldwide, from Fortune 500® enterprises to small businesses, managed service providers (MSPs), government agencies, and educational institutions. We are committed to focusing exclusively on IT, MSP, and DevOps professionals, and strive to eliminate the complexity that our customers have been forced to accept from traditional enterprise software vendors. Regardless of where the IT asset or user sits, SolarWinds delivers products that are easy to find, buy, use, maintain, and scale while providing the power to address key areas of the infrastructure from on-premises to the cloud. This focus and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as the worldwide leader in both network management software and MSP solutions, and is driving similar growth across the full spectrum of IT management software. Our solutions are rooted in our deep connection to our user base, which interacts in our THWACK® online community to solve problems, share technology and best practices, and directly participate in our product development process.
